**EquilibriumSolver class: TP/TV**

Module: CT-EQUIL - TP/TV

Tolerance of the composition of the mixture

1.0e-14

Tolerance of the Gibbs/Helmholtz minimization method

1.0e-06

Maximum number of iterations of Gibbs/Helmholtz minimization method

70

Tolerance of the composition of the mixture (guess)

1.0e-06

Tolerance of the mass balance

1.0e-06

Tolerance of the dimensionless Lagrangian multiplier - ions

1.0e-04

Maximum number of iterations of charge balance (ions)

30

Minimum temperature [K] to consider ionized species

0 K
